FOR IMMEDIATE RELEASE

Geometric to demonstrate the power of automation with CAMWorks and DFMPPro at SolidWorks World 2008

Both CAMWorks® and DFMPPro are seamlessly integrated within SolidWorks®

Scottsdale, Arizona. January 08, 2008 - Geometric Technologies, Inc. (formerly TekSoft, Inc.), an industry leader in developing advanced manufacturing software, will showcase the latest releases of CAMWorks® and DFMPPro at SolidWorks World 2008 (booth #539) in San Diego, California, from January 20 to 23, 2008.

CAMWorks was the first SolidWorks® certified Gold CAM product and the first CAM solution to offer knowledge-based feature recognition and associative machining capabilities, seamlessly integrated into the SolidWorks 3D mechanical design software. The combination of the latest innovations in CAMWorks 2008 and SolidWorks' excellence in design, continue to make CAMWorks a premier CAM solution. The latest release of CAMWorks has over 50 enhancements and new features to machine faster and more accurately. This release has significant advances in 3-axis functionality, new features and cutting strategies for 2 to 5 axis milling, turning and wire EDM. More information on CAMWorks is available at www.camworks.com.

The recently launched DFMPPro 2008 add-on for SolidWorks is a revolutionary "Design for Manufacturability" product developed for designers and manufacturing engineers to facilitate upstream manufacturability validation and identification of areas in design that are difficult, expensive or impossible to manufacture. DFMPPro is engineered for quick and in-depth examination of product manufacturability. DFMPPro is an advanced version of DFMPXpress, a free tool shipped with every seat of SolidWorks 2008. More information on DFMPPro is available at www.dfmpro.com.

Demonstrations of CAMWorks and DFMPPro will be available in booth #539 throughout the three-day conference. Attendees will have the opportunity to speak with the company's application engineers and executives and learn about CAMWorks and DFMPPro at the following presentations:

- Geometric Technologies will present "CAMWorks, Machining Intelligence for Automation" at the Certified Partner Theater on Wednesday, January 23, at 12:30 p.m. Director of Support and Services, Michael Sours, will demonstrate the latest innovations in CAMWorks and the close integration in SolidWorks that facilitates machining processes and boosts shop productivity.
- Head of R&D, Desktop Products and Technologies, Sameer Kondejkar, will provide a hands-on session on "Design for Manufacturability Validation within SolidWorks" in room #5-B on Wednesday, January 23, at 10:30 a.m. Participants will learn how to optimize design for manufacturability within the SolidWorks environment. Attendees will use integrated DFMPXpress and DFMPPro review tools to evaluate design manufacturability. They will learn how to make changes to the design as recommended by the tool, without compromising on intent and functionality.

About Geometric

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM), enable companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Geometric was incorporated in 1994 and is headquartered in Mumbai, India. It is listed on the Bombay Stock Exchange (BSE: 532312) and the National Stock Exchange (NSE: GEOMETRIC) in India. For its consolidated operations for the year ending March 2007, the company recorded revenues of 3.95 Billion Rupees (85 Million US Dollars), with market capitalization of 6.2 Billion Rupees (142 Million US Dollars) as on 31st March 2007.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The unit includes Phoenix AZ-based business subsidiary, Geometric Technologies, Inc., formerly TekSoft, Inc., which has over twenty five years in progressive product innovation. It develops and markets CAMWorks®, a SolidWorks® certified Gold CAM product, besides marketing and distributing Geometric's products and technologies.

The end-user products from Geometric include CAMWorks, eDrawings Publisher, DFMPPro and GeomCaliper®. eDrawings Publisher is a lightweight intuitive collaboration tool for 3D models that enables publishing of 3D model from all major CAD systems. DFMPPro is an automated intuitive tool for designers to accurately predict the manufacturability of models. GeomCaliper is an integrated, automated and easy to use thickness checker for 3D CAD models.

The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
