FOR IMMEDIATE RELEASE

Geometric Technologies to display advances in automation with CAMWorks and DFMPRO at WESTEC

Scottsdale, Arizona, February 19, 2008 - Geometric Technologies, Inc. (formerly TekSoft, Inc.), an industry leader in developing advanced manufacturing software, will showcase the latest releases of CAMWorks® and DFMPRO at the WESTEC 2008 Exposition & Conference (booth #S-3574) in the Los Angeles Convention Center from March 31 to April 3, 2008.

CAMWorks 2008 delivers a powerful set of over 50 new performance enhancements, user interface improvements, and strategies to meet the machining requirements of diverse applications. These include improved speed and toolpath reliability for multi-axis operation, improved simulation speed and quality, and numerous user interface options for display and navigation that add to CAMWorks ease of use. New toolpath strategies and controls have been implemented for 2-5 axis milling, turning and wire EDM to improve quality and decrease machining time. Significant enhancements in 3 axis milling include:

- A new Adaptive roughing strategy that provides the ability to cut using the full depth of the tool and safely run the machine at optimum speed, which can reduce machining time up to 40% over conventional roughing with less wear.
- Z Level combination toolpath option for constant step strategy on shallower slope areas.
- Additional control over pencil milling.

According to Bruce Wiener, Director of Research & Development, Geometric Technologies, "CAMWorks 2008 is the result of leveraging a strong foundation in CAM technology that allows Geometric Technologies to increase its innovative edge in delivering CAM solutions and compete successfully in the expanding market for solids machining. We continually improve CAMWorks to meet the needs of the mold-making and machining industries."

CAMWorks is a SolidWorks® Certified Gold CAM Product that provides state-of-the-art machining capabilities seamlessly integrated into the award winning SolidWorks 3D mechanical design software. CAMWorks can be purchased to run with SolidWorks or as part of a cost-effective package that includes CAMWorks Solids, an integrated solid modeler. More information on CAMWorks is available at www.camworks.com.

DFMPRO is a revolutionary "Design for Manufacturability" product developed for designers and manufacturing engineers to facilitate upstream manufacturability validation and identification of areas in design that are difficult, expensive or impossible to manufacture. DFMPRO is engineered for quick and in-depth examination of product manufacturability. DFMPRO is an advanced version of DFMPROpress, a free tool shipped with every seat of SolidWorks 2008. More information on DFMPRO is available at www.dfmpro.com.

About Geometric

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM), enable companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Geometric was incorporated in 1994 and is headquartered in Mumbai, India. It is listed on the Bombay Stock Exchange (BSE: 532312) and the National Stock Exchange (NSE: GEOMETRIC) in India. For its consolidated operations for the year ending March 2007, the company recorded revenues of 3.95 Billion Rupees (85 Million US Dollars), with market capitalization of 6.2 Billion Rupees (142 Million US Dollars) as on 31st March 2007.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The unit includes Phoenix AZ-based business subsidiary, Geometric Technologies, Inc., formerly TekSoft, Inc., which has over twenty five years in progressive product innovation. It develops and markets CAMWorks®, a SolidWorks® certified Gold CAM product, besides marketing and distributing Geometric's products and technologies.

The end-user products from Geometric include CAMWorks, eDrawings Publisher, DFMPPro and GeomCaliper®. eDrawings Publisher is a lightweight intuitive collaboration tool for 3D models that enables publishing of 3D model from all major CAD systems. DFMPPro is an automated intuitive tool for designers to accurately predict the manufacturability of models. GeomCaliper is an integrated, automated and easy to use thickness checker for 3D CAD models.

The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
