## Geometric to demonstrate its product suite at EuroMold 2009

**Mumbai, India, November 19, 2009:** [Geometric Limited](#) (BSE: 532312, NSE: GEOMETRIC), a leader in Product Lifecycle Management (PLM), Engineering Services and Offshore Product Development (OPD) solutions and technologies, will demonstrate its leading CAD/CAM products, including the intuitive CAM application, [CAMWorks®](#), in Booth # E130, Hall 8 at EuroMold 2009, from December 2 to 5, 2009 at the Exhibition Fair Ground, Frankfurt, Germany.

As an exhibitor, Geometric will show how CAMWorks can help companies make their programming of CNC machines more effective, and turn virtual CAD models into reality. CAMWorks 2009 has over 100 user driven features and enhancements, to enable users to program parts faster and more easily. In addition, it provides a significant number of new machining options to further strengthen CAMWorks' existing manufacturing capabilities. Certified CAMWorks technicians will demonstrate 5-axis machining related functionalities, and show videos highlighting the various features executed on machine parts using 5-axis machining. At the event, the company will also give a sneak-preview of the new functions in the yet-to-be-launched CAMWorks version 2010.

"Since the release of the first CAMWorks version back in 1998, we have been showcasing CAMWorks at EuroMold each year. It has constantly been one of the most successful shows for us due to the high level of visitors coming to EuroMold", said Mr. Robert Hutter, Director, Product Sales – Europe.

Geometric will also demonstrate two other products for CAD designers – [DFMPro](#) and [GeomCaliper®](#). DFMPro is a CAD integrated design for manufacturability check tool. It automatically identifies areas in a design, which are difficult, expensive, or impossible to manufacture. GeomCaliper is a CAD integrated wall thickness analysis tool, which highlights critical areas in a design that would cause defects in cast and molded parts. The demonstrations of these products will also include a hands-on session for the attendees, while highlight the benefits experienced by existing users of the product.

### About Euromold

Euromold 2009 is the 16th Euromold event, and more than 1,500 exhibitors and approximately 60,000 visitors from 45 countries worldwide are expected to attend this event. The whole process chain "From Design to Prototyping to Series Production" is represented at EuroMold. A unique fair concept closes the gap between industrial designers, product developers, producers, suppliers, and end-users. For more information see [www.euromold.com](http://www.euromold.com)

### About Geometric

Geometric ([www.geometricglobal.com](http://www.geometricglobal.com)) is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and

manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 5.98 billion (US Dollars 129.47 million) for the year ended March 2009. It employs close to 3000 people across 11 global delivery locations in the US, France, Romania, India, and China. Geometric is assessed at SEI CMMI Level 5 for its software services and ISO 9001:2000 certified for engineering operations.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPPro, GeomCaliper® and 3DPaintBrush™. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
